Subject Index of Volume 217

Alloys
transport properties: conductivity, thermoelectric power and Hall constant on Au–Cr thin film alloys, obtained by controlled coevaporation, 120
Amorphous materials
electrical transport in n-type bismuth modified a-$Ge_{20}Se_{80}$ and a-As_2Se_3 thin films, 146
Some anomalous optical and electrical anomalous properties of $M/MoO_3/M$ sandwich structure, 138
Anisotropy
photoinduced variations of the internal electric field in Langmuir–Blodgett films with azo dye monolayer, 167
Annealing
ohmic behaviour of Au/WSiN/(AuGeNi)–n-GaAs systems, 108
Auger electron spectroscopy
characterization of high quality *c* axis oriented ZnO thin films grown by MOCVD using zinc acetate as source material, 133
structural and magnetic properties of iron–tin thin films, 152

Beryllium
effect of silicon on the structure of beryllium films, 83
Bismuth
electrical transport in n-type bismuth modified a-$Ge_{20}Se_{80}$ and a-As_2Se_3 thin films, 146

Carbon
r.f. plasma-assisted chemical vapour deposition of diamond-like carbon: physical and mechanical properties, 56
Chemical vapour deposition
high frequency $C-V$ investigation of metal–oxide–semiconductor capacitors prepared by low temperature subatmospheric pressure chemical vapour deposition of SiO_2 films on silicon substrates, 68
Chromium
transport properties: conductivity, thermoelectric power and Hall constant of Au–Cr thin film alloys, obtained by controlled coevaporation, 120
Coatings
r.f. plasma-assisted chemical vapour deposition of diamond-like carbon: physical and mechanical properties, 56
effect of silicon on the structure of beryllium films, 83
Contacts
ohmic behaviour of Au/WSiN/(AuGeNi)–n-GaAs systems, 108
Copper
comparative analysis of interdiffusion in some thin film metal couples at room temperature, 26
Corrosion
effect of a titanium underlayer on the corrosion behaviour of physically vapour deposited titanium nitride films, 31

Deposition process
preparation and microstructure of WS_2 thin films, 91

Electrical properties
high frequency $C-V$ investigation of metal–oxide–semiconductor capacitors prepared by low temperature subatmospheric pressure chemical vapour deposition of SiO_2 films on silicon substrates, 68
Electrical properties and measurements
electrical transport in n-type bismuth modified a-$Ge_{20}Se_{80}$ and a-As_2Se_3 thin films, 146
some anomalous optical and electrical anomalous properties of $M/MoO_3/M$ sandwich structure, 138
effect of oxygen on the electrical characteristics of triclinic lead phthalocyanine, 75
transport properties: conductivity, thermoelectric power and Hall constant of Au–Cr thin film alloys, obtained by controlled coevaporation, 120
Electrochemistry
preparation of thin polycrystalline films of cuprous iodide and photoelectrochemical dye-sensitization, 129
Electron energy loss spectroscopy
electron and ion radiation damage of a-C:H films detected by energy loss spectroscopy of reflected and transmitted electrons, 48
Electron microscopy
preparation and microstructure of WS_2 thin films, 91
Epitaxy
epitaxial growth of monoclinic and cubic ZrO_2 on Si(100) without prior removal of the native SiO_2, 125
growth of high quality ZnSe epitaxial layers on transparent substrates CaF_2 by atmospheric pressure metallo-organic chemical vapour deposition, 98
Evaporation
effect of silicon on the structure of beryllium films, 83

Fluourine
r.f. megnetron deposition of calcium fluoride, 87
structure of thin fluoride films deposited on amorphous substrates, 7

Gallium arsenide
low-temperature photoluminescence of short-period GaAs/AlAs superlattices, 62
Gallium oxide
ohmic behaviour of Au/WSiN/(AuGeNi)–n-GaAs systems, 108
Glow discharge
growth, composition and structure of plasma-deposited siloxane and silazane, 17
r.f. magnetron deposition of calcium fluoride, 87
some effects of the plasma nitriding process on layer properties, 38
Gold
comparative analysis of interdiffusion in some thin film metal couples at room temperature, 26
transport properties: conductivity, thermoelectric power and Hall constant of Au–Cr thin film alloys, obtained by controlled coevaporation, 120
Growth mechanism
growth, composition and structure of plasma-deposited siloxane and silazane, 17

Hardness
some effects of the plasma nitriding process on layer properties, 38
Heterostructures
growth of high quality ZnSe epitaxial layers on transparent substrates CaF_2 by atmospheric pressure metallo-organic chemical vapour deposition, 98

Inorganic compounds
preparation of thin polycrystalline films of cuprous iodide and photoelectrochemical dye-sensitization, 129
Interfaces
ohmic behaviour of Au/WSiN/(AuGeNi)–n-GaAs systems, 108
Ion bombardment
r.f. plasma-assisted chemical vapour deposition of diamond-like carbon: physical and mechanical properties, 56

Langmuir–Blodgett films
enhancement of the second-order hyperpolarizability of a stilbene dye by molecular interactions, 161
photoinduced variations of the internal electric field in Langmuir–Blodgett films with azo dye monolayer, 167
Stark effect in hole-burning spectra of dye-doped Langmuir–Blodgett films, 178
Luminescense
low-temperature photoluminescence of short-period GaAs/AlAs superlattices, 62

Magnetic properties
magnetic flux relaxation in $YBa_2Cu_3O_{7-x}$ thin film: thermal or athermal, 156
structural and magnetic properties of iron–tin thin films, 152
structural investigation of b.c.c. 304 stainless steel, 1
Metal–organic chemical vapour
characterization of high quality c axis oriented ZnO thin films grown by MOCVD using zinc acetate as source material, 133
Metal–oxide semiconductor structures
high frequency $C-V$ investigation of metal–oxide–semiconductor capacitors prepared by low temperature subatmospheric pressure chemical vapour deposition of SiO_2 films on silicon substrates, 68
Molybdenum oxide
some anomalous optical and electrical anomalous properties of $M/MoO_3/M$ sandwich structure, 138
Monolayers
Stark effect in hole-burning spectra of dye-doped Langmuir–Blodgett films, 189
Mössbauer spectroscopy
structural investigation of b.c.c. 304 stainless steel, 1
Multilayers
effect of a titanium underlayer on the corrosion behaviour of physically vapour deposited titanium nitride films, 31
preparation of thin polycrystalline films of cuprous iodide and photoelectrochemical dye-sensitization, 129
Stark effect in hole-burning spectra of dye-doped Langmuir–Blodgett films, 178

Optical coatings
enhancement of the second-order hyperpolarizability of a stilbene dye by molecular interactions, 161
structure of thin fluoride films deposited on amorphous substrates, 7
Optical properties
alterations in optical properties of materials covered with oxide films during laser heating in gases, 102
electrical transport in n-type bismuth modified a-$Ge_{20}Se_{80}$ and a-As_2Se_3 thin films, 146
growth of high quality ZnSe epitaxial layers on transparent substrates CaF_2 by atmospheric pressure metallo-organic chemical vapour deposition, 98
low temperature photoluminescence of short-period GaAs/AlAs superlattices, 62
photoinduced variations of the internal electric field in Langmuir–Blodgett films with azo dye monolayer, 167
some anomalous optical and electrical anomalous properties of $M/MoO_3/M$ sandwich structure, 138
Optical spectroscopy
Stark effect in hole-burning spectra of dye-doped Langmuir–Blodgett films, 178
Organic substances
effect of oxygen on the electrical characteristics of triclinic lead phthalocyanine, 75
Oxides
epitaxial growth of monoclinic and cubic ZrO_2 on Si(100) without prior removal of the native SiO_2, 125
structure of vapor-deposited yttria and zirconia thin films, 113
theoretical expressions for secondary electron emission from metal oxide films as a function of measurable variables, 193
Oxygen
effect of oxygen on the electrical characteristics of triclinic lead phthalocyanine, 75

Photovoltage
preparation of thin polycrystalline films of cuprous iodide and photoelectrochemical dye-sensitization, 129
Physical vapour deposition
effect of a titanium underlayer on the corrosion behaviour of physically vapour deposited titanium nitride films, 31
structure of thin fluoride films deposited on amorphous substrates, 7
Plasma processing
some effects of the plasma nitriding process on layer properties, 38
Plasma processing and deposition
growth, composition and structure of plasma-deposited siloxane and silazane, 17
r.f. plasma-assisted chemical vapour deposition of diamond-like carbon: physical and mechanical properties, 56
Polymers
growth, composition and structure of plasma-deposited siloxane and silazane, 17
Pyrolysis
copper-doped SnO_2 thin films for PH_3 detection, 187

Quantum effects
magnetic flux relaxation in $YBa_2Cu_3O_{7-x}$ thin film: thermal or athermal, 156

Rutherford backscattering
epitaxial growth of monoclinic and cubic ZrO_2 on Si(100) without prior removal of the native SiO_2, 125
structural and magnetic properties of iron–tin thin films, 152

Second harmonic generation
enhancement of the second-order hyperpolarizability of a stilbene dye by molecular interactions, 161
Secondary electron emission
theoretical expressions for secondary electron emission from metal oxide films as a function of measurable variables, 193
Semiconductors
effect of oxygen on the electrical characteristics of triclinic lead phthalocyanine, 75
Sensors
copper-doped SnO_2 thin films for PH_3 detection, 187

Silicon oxide
high frequency $C-V$ investigation of metal–oxide–semiconductor capacitors prepared by low temperature subatmospheric pressure chemical vapour deposition of SiO_2 films on silicon substrates, 68
Sputtering
r.f. magnetron deposition of calcium fluoride, 87
Steels
structural investigation of b.c.c. 304 stainless steel, 1
Stress
growth of high quality ZnSe epitaxial layers on transparent substrates CaF_2 by atmospheric pressure metallo-organic chemical vapour deposition, 98
Structural properties
enhancement of the second-order hyperpolarizability of a stilbene dye by molecular interactions, 161
structural and magnetic properties of iron–tin thin films, 152
structural investigation of b.c.c. 304 stainless steel, 1
structure of thin fluoride films deposited on amorphous substrates, 7
Sulphides
preparation and microstructure of WS_2 thin films, 91
Superconductivity
magnetic flux relaxation in $YBa_2Cu_3O_{7-x}$ thin film: thermal or athermal, 156
Superlattices
low-temperature photoluminescence of short-period GaAs/AlAs superlattices, 62
Surface diffusion
some effects of the plasma nitriding process on layer properties, 38
Tin oxide
copper-doped SnO_2 thin films for PH_3 detection, 187
Titanium nitride
effect of a titanium underlayer on the corrosion behaviour of physically vapour deposited titanium nitride films, 31
Transmission electron spectros
electron and ion radiation damage of a-C:H films detected by energy loss spectroscopy of reflected and transmitted electrons, 48
Tungsten
preparation and microstructure of WS_2 thin films, 91

X-ray adsorption
structure of vapor-deposited yttria and zirconia thin films, 113
X-ray diffraction
characterization of high quality c axis oriented ZnO thin films grown by MOCVD using zinc acetate as source material, 133
X-ray photoelectron spectroscopy
characterization of high quality c axis oriented ZnO thin films grown by MOCVD using zinc acetate as source material, 133
r.f. magnetron deposition of calcium fluoride, 87

Yttrium
structure of vapor-deposited yttria and zirconia thin films, 113

Zirconium
epitaxial growth of monoclinic and cubic ZrO_2 on Si(100) without prior removal of the native SiO_2, 125
structure of vapor-deposited yttria and zirconia thin films, 113
